

PHILIPS

INDUSTRIES LIMITED

HALIFAX - MONTREAL - TORONTO - WINNIPEG - VANCOUVER

FROM

General Bulletin No. 3-51.

NO.

January 24th, 1951.

To: All Philips Dealers and Independent Servicemen

MODEL - 977

SUBJECT: Bass response

We have received some requests for advice in increasing the bass response of the Model 977 radio/phonograph combination set, and thought that all dealers and service technicians might be interested in having this information.

The bass response of the 977 may be increased by changing both C61 and C69 to .02 uF 400 V, d.c.w.

Yours very truly,

PHILIPS INDUSTRIES LIMITED.

M. E. Nylin,
General Service Manager.
