

RCA VICTOR

AC-DC-BATTERY PORTABLE RADIO MODEL P-234 SERVICE DATA

GENERAL DESCRIPTION

Model P-234

The Model P-234 is a three way "personal" portable radio receiver using four miniature tubes and a selenium rectifier.

The receiver circuit is a conventional superheterodyne including a pentagrid converter, IF amplifier stage, combined detector — A-V-C — first audio stage and power amplifier.

The Model P-234 is similar to the Model P-132 Portable Receiver with a slight difference in cabinet design.

For electrical and mechanical specifications, alignment procedures, chassis layout, schematic and replacement parts, please refer to the Model P-132 Portable Receiver Service Note — 1956 No. 9, or Volume RT-111 page 85.

For parts not common to the Model P-132, please refer to the Replacement Parts List below.
