

SUBSTITUTION FOR ROGERS METAL SPRAY TUBES 6H7M AND 6H7S

6H7M - A 6AD7G tube is a direct substitute except that the control grid is connected to socket pin #1 instead of to the grid control cap on the 6H7M.

6H7S - A 6AD7G will substitute a 6H7S but it is necessary to change the tube socket to an octal (K8A) type and wire the socket as shown below.

6H7S

6H7M

6AD7G
